Environmental protection: **HARMFUL TO FISH OR OTHER AQUATIC LIFE.**

Do not contaminate water with the product or its container (Do not clean application equipment near surface water).

Storage: KEEP PRODUCT IN ORIGINAL CONTAINER, tightly closed, in a safe place.

INSTRUCTIONS FOR USE

What Doff® Lawn Weedkiller Ready to Use does: Controls most major lawn weeds including clover.

When to use: For use on lawns. Use from Spring (April) to September on lawns that are actively growing.

Directions for use: Do not apply during windy conditions to prevent spray drifting onto other plants.

Method of Application: Ready to use applicator. Shake well before use. Keep the sprayer 20cm from the target weeds.

Point the nozzle at the weeds and squeeze. Ensure all the weed leaves are covered. For the majority of weeds, a single squeeze is sufficient. Direct spray away from ponds and other water bodies. Scorching of grass can occur if more than one squeeze is applied to a given area. Re-treatment may be necessary for well established difficult to control weeds.

Allow an interval of at least 6 weeks between treatments.

NOTE: DO NOT USE ON NEW-SOWN LAWNS FOR AT LEAST 6 MONTHS AFTER ESTABLISHMENT.

How to get the best results from Doff® Lawn Weedkiller Ready to Use: For maximum effect spray when the weeds have adequate leaf area to absorb the chemical. Apply when weeds are actively growing and soil is moist.

Following spraying, do not cut grass for at least one day after treatment and ideally leave the sprayed area uncut for as long as practicable, to allow the chemical sufficient action to be translocated from the leaf and throughout the plant to the roots. Control may be reduced if rain falls within 24 hours of application.

Disposal of Lawn Clippings: The first 4 mowing of treated grass must be composted for 6 months before use as a mulch.

Doff® Lawn Weedkiller Ready to Use must not be used for purposes or in a manner not provided for on the label.

DO NOT RE-USE EMPTY CONTAINER. Protect from frost. Wash hands after use.

PETS & CHILDREN: Exclude pets and children during treatment but once the area has dried they need not be excluded. UK Only. This product is under The Control of Pesticides Regulations 1986.
